

THE ORIGINAL SPÜLBOY® GLASS WASHING SYSTEM

Glass cleaning, wherever it is necessary!

The Twin-Go T Portable is the ideal solution when it comes to cleaning the glasses without a sink. The principle is easy as usual, however very efficient. The glass is getting cleaned mechanically in the pre washing canister through the inner- and outer brushes in combination with our tablets, which are developed exclusively for the Spülboy® glass washing machines and ensure a 100 % bacteria free and herpes virus free result. In the rinsing canister the glasses are getting rinsed with a jet of fresh water through the well established telescopic rinse and the elaborated double ring-shower to a length of 24 cm.

Through an additional, waste water drain hose system at the bottom of the Twin-Go T Portable, this machine can easily be installed and used at the top of the bar counter, at the working desk or garden table – wherever you might want to take a drink!

Due to our biological degradable tablets, which are non-toxic, you can let your waste water be drained without any doubts.

Thanks to the Twin-Go T Portable, you are at liberty to exercise the next mobile, hygienic flawless glass washing wherever you want!

The right connection:
We can support you with the right adaptor for nearly every water connection.

Twin-Go T Portable
Waste water drain system makes mobile use possible – also without counter sink.

TWIN-GO T Portable

Well-established Spülboy® with new technical refinements. As „Twin-Go T“, the robust 2-container unit inherited the current flexible telescopic rinsing system from Neptun T2000. Here as well, you can also wash all glasses including handle and foot up to a depth of 24 cm.

Technical data:
Length: 37,5 cm
Width: 18,5 cm
Height: 32,5 cm
Container Ø: 18 cm
Weight: 2,9 kg

Twin-Go T Portable Art.-No. • 1552
